*Practice Overview*

---

Annie came to the bar from a nursing background specialising in Accident and Emergency in central London. In the latter stages of her clinical career her responsibilities broadened to include the general management of A&E and Outpatient Services to which she added lecturing in major disasters before concluding her time in the NHS in a consultancy role.

Annie's practice covers private and public law children and the full spectrum of financial remedies cases. Of particular interest to her are cases involving removal from the jurisdiction and non accidental injuries. In the former, her experience has been predominantly in non Hague convention matters.

Annie is also a qualified mediator mediating in all family and financial issues.
